

TinyTERM for iOS Version History

Updated 10/22/2021

TinyTERM Enterprise v3.5.0 – October 22, 2020

Enhancements

- TTIOS-330 - Ability to change key colors
- TTIOS-467 - Automatic text wrap on key labels
- TTIOS-478 - System keyboard cannot be made transparent
- TTIOS-573 - Add beep on successful Scandit barcode read
- TTIOS-576 - Add ability to submit debug logs directly to support

Fixes

- TTIOS-578 - Movement keepalive isn't working
- TTIOS-579 - SSH known_hosts only uses the first entry instead of including all matches

TinyTERM Enterprise v3.4.5 – June 17, 2020

Fixes

- TTIOS-572 - keymap.json not importing

TinyTERM Enterprise v3.4.4 – May 29, 2020

Enhancements

- TTIOS-444 - Shortcut for switching between open sessions with keyboard keys
- TTIOS-525 - Open multiple sessions with Configuration Lock on
- TTIOS-561 - Update ZBar to not have a dependency on UIWebView
- TTIOS-570 - Add key mappings to procedures for special TCS keys, e.g. [menu]

Fixes

- TTIOS-231 - Print Screen from scoadmin sends blank sheet
- TTIOS-434 - Shading off-center when Config Lock dialog comes up
- TTIOS-486 - Updated external.ttcodepage
- TTIOS-569 - Accessing ZBar scanner causes crash if TinyTERM is not granted access to the camera

TinyTERM Enterprise v3.4.3 – March 2, 2020

Enhancements

- TTIOS-557 - Option to disable keyboard swipe

Fixes

- TTIOS-549 - Fix issue on the iPad where the 10-key keypad animates back into place when already visible whenever redisplay is called
- TTIOS-550 - Fix crash that occurs when toggling the system keyboard to be visible with external input mode enabled and external-layout="Use Main Layout"
- TTIOS-552 - Imported ttconfig can cause full-screen display even with keyboard up

- TTIOS-553 - Errors mapping macro to key
- TTIOS-559 - Screen resizes for supplemental layouts, even with external keyboard

TinyTERM Enterprise v3.4.2 – January 13, 2020

Enhancements

- Added .tpx file option for Scandit Aim and Scan

Fixes

- TTIOS-549 - Fix issue on the iPad where the 10-key keypad animates back into place when already visible whenever redisplay is called
- TTIOS-550 - Fix crash that occurs when toggling the system keyboard to be visible with external input mode enabled and external-layout="Use Main Layout"
- TTIOS-551 - Fix display issue of our custom keyboard after leaving/re-entering the app when the SwiftKey keyboard is installed and set as the main system keyboard
- TTIOS-552 - Imported ttconfig can cause full-screen display even with keyboard up
- Additional user interface bug fixes

TinyTERM Enterprise v3.4.1 – November 12, 2019

Enhancements

- Improved support for iOS 13

Fixes

- TTIOS-547 - Japanese display errors

TinyTERM Enterprise v3.4.0 – September 29, 2019

Enhancements

- TTIOS-534 – Cognex MX-100 support
- TTIOS-542 – Allow Scandit licenses to be added via LCS

Fixes

- TTIOS-541 – Macros cannot start recording before a session is recorded
- TTIOS-543 – Macros assigned to keys also sending the key values
- TTIOS-544 – After assigning a macro to a key, on the iPad you cannot dismiss the popover
- TTIOS-546 – IBM Up arrow acts like F9

TinyTERM Enterprise v3.3.1 – September 11, 2019

Fixes

- TTIOS-540 – Crash on iOS 9.3.5

TinyTERM Enterprise v3.3.0 – September 9, 2019

Enhancements

- TTIOS-497 – Finish Screen Matching/Keymap support in iOS
- TTIOS-510 – GB2312 support
- TTIOS-512 – Add tpx-adjustable connection timeout
- TTIOS-513 – Keyboard swipe
- TTIOS-538 – Support for including device info in WRU response strings
- Added support for TinyTERM Enterprise TE Server proxy

Fixes

- TTIOS-517 – Scrollback broken when scrolling more than one line at a time
- TTIOS-521 – Crash when performing reset
- TTIOS-522 – Key repeat broken
- TTIOS-535 – 3270 and 5250 sometimes show wrong keyboard layouts
- TTIOS-536 – Turning on supplemental 5250 keyboard blanks screen
- TTIOS-539 – Fix Info.plist problems

TinyTERM Enterprise v3.2.0 – November 26, 2018

Enhancements

- TTIOS-370 – Remember and restore keyboard status and zoom state when switching apps
- TTIOS-437 – Split View support
- TTIOS-455 – End of line wrap on/off option
- TTIOS-462 – Display keyboard automatically after scan

Fixes

- TTIOS-377 – Black screen in landscape mode with standard iPad keyboard
- TTIOS-435 – Screen reverts to 80 columns with multiple sessions
- TTIOS-446 – Crash when TT started in landscape mode on iPod
- TTIOS-463 – Non-transparent keyboard pushes top of emulator off screen
- TTIOS-501 – Rotating while hidden title bar pulled down causes extra space
- TTIOS-502 – Fix minor TE-View/Keyboard issues
- TTIOS-503 – Fix issue with the navigation bar position being too low on the top navigation controller
- TTIOS-505 – Log Size button erases all configs
- TTIOS-507 – Inserting PF keys from external keyboard is broken for TN3270

TinyTERM Enterprise v3.1.13 – August 16, 2018

Enhancements

- TTIOS-270 – Display keyboard automatically after login
- TTIOS-440 – Don't erase data immediately on selecting Change Configuration Type
- TTIOS-494 – Add support for validating self-signed certificates to the Industrial Browser

Fixes

- TTIOS-482 – IBM 3151 ignores "Clear All" sequence
- TTIOS-493 – Fix overlap of toolbar with status bar on iOS 11
- TTIOS-495 – Fix problem with HTTP 302 redirect within the industrial browser
- TTIOS-496 – Keyboard disappears when trying to unlock config from within Web session
- TTIOS-498 – The TE-View is resized to be too large vertically after disconnecting an external keyboard and hiding the soft keyboard on the iPhone X
- TTIOS-500 – iPad in landscape gives portrait mode emulation if keyboard not transparent

TinyTERM Enterprise v3.1.12 – April 20, 2018

Fixes

- TTIOS-490 – Session stop dialog hangs app on iOS 11

TinyTERM Enterprise v3.1.11 – March 14, 2018

Enhancements

- TTIOS-491 – Add support for Cognex MX series scanners
- TTIOS-492 – Remove support for Grabba scanners

TinyTERM Enterprise v3.1.10 – January 10, 2018

Enhancements

- TTIOS-456 – Key click for custom keyboards

TinyTERM Enterprise v3.1.9 – May 31, 2017

Enhancements

- iOS Product line consolidated into TinyTERM Enterprise

TinyTERM Lite/Plus/Enterprise v3.1.8 – April 18, 2017

Fixes

- TTIOS-479 – Crashes when running in non-UTF-8 mode

TinyTERM Lite/Plus/Enterprise v3.1.7 – April 10, 2017

Enhancements

- TTIOS-470 – Support for CJK Languages in UTF-8 Mode
- TTIOS-472 – Add license through Managed App Config

Fixes

- TTIOS-469 – Greek & German characters not displaying properly in UTF-8 Mode
- TTIOS-473 – Incorrect size from standard iOS keyboard
- TTIOS-474 – Save Password message in wrong position in Manage SSH Keys screen
- TTIOS-475 – Keyboard selection menu checkboxes disappearing

- TTIOS-476 – System keyboard appearing inappropriately
- TTIOS-477 – Landscape keyboards not centered vertically

TinyTERM Lite/Plus/Enterprise v3.1.5 – March 20, 2016

Enhancements

- TinyTERM Lite now requires registration

TinyTERM Lite/Plus/Enterprise v3.1.4

Fixes

- TTIOS-460 – 5250 Numeric fields not right-adjusting and filling with zeros
- TTIOS-466 – 5250 emulation does not handle Insert Cursor request in the middle of Write Error Code
- TTIOS-468 – Licensing dialogs not word-wrapping

TinyTERM Lite/Plus/Enterprise v3.1.3 – March 20, 2016

Fixes

- TTIOS-457 – 3278-5 negotiations failing resulting in 3278-2 connection
- TTIOS-458 – SSL Connections failing in Citrix environment
- TTIOS-459 – Add in support for handling "smcup" and "rmcup" escape codes

TinyTERM Lite/Plus/Enterprise v3.1.2 – March 10, 2016 (available March 17)

Fixes

- TTIOS-450 – Copy/Paste menu not showing until after screen rotation or resizing
- TTIOS-451 – SSL Connections are failing with error 522, unexpected message
- TTIOS-453 – Cannot export configurations
- Removed Mobilogics SDK

TinyTERM Lite/Plus/Enterprise v3.1.1 – February 18, 2016 (available February 23)

Enhancements

- TTIOS-4 – VPN On Demand support (CR 907)
- TTIOS-266 – Per-app VPN support

Fixes

- TTIOS-431 – Signed Numeric 5250 fields losing last digit with positive values
- TTIOS-432 – Creating new config after failed SSL connection causes crash
- TTIOS-433 – Selecting SSL/TLS connection causes RS232 info to come up
- TTIOS-436 – Auto-start macros cannot be selected from the config detail screen
- TTIOS-438 – Crash switching from Safari via double-tap of Home button
- TTIOS-441 – Crash remapping keys
- TTIOS-442 – Keyboard menu stays up
- TTIOS-447 – Capabilities query problem in TN3270
- TTIOS-448 – Deleting a configuration in iOS 6 crashes TinyTERM

- TTIOS-449 – The START button on the configurations fails on iOS 6 devices

TinyTERM Lite/Plus/Enterprise v3.1.0 – September 16, 2015

Enhancements

- iOS 9 Compatibility
- TTIOS-417 – Add auto remote configure feature that can be configured in the plist
- TTIOS-424 – Prevent keyboard mapping when configuration locked

Fixes

- TTIOS-416 – PCICSP9 Transaction " is not recognized
- TTIOS-418 – TinyTERM Plus "feature not available" message says TinyTERM Lite
- TTIOS-419 – Rows rolls back to 25 if a one-digit number is entered
- TTIOS-423 – Crash on failed user/pass SSH authentication
- TTIOS-425 – Keepalive options missing
- TTIOS-426 – Crash in ADDS/wy50/wy60 clrstat() when setting up status line
- TTIOS-430 – Vertical keyboard layouts print keys too small

TinyTERM Lite/Enterprise v3.0.1, TinyTERM Plus v2.1.7 – July 3, 2015

Fixes

- TTIOS-409 – Crash when selecting a codepage
- TTIOS-410 – Crash when hitting connect on configuration in "Ask" mode
- TTIOS-412 – Help URL in Plus incorrect
- TTIOS-413 – ESC [; r ignored by VT emulations
- TTIOS-414 – Local notifications don't work in iOS 8.4
- TTIOS-415 – iPhone 6 Plus scaling is incorrect resulting in jaggy fonts

TinyTERM Lite/Enterprise v3.0.0, TinyTERM Plus v2.1.6 – June 12, 2015

Enhancements

- TTIOS-71 – Multiple session support (CR 1017)
- TTIOS-323 – Add in option to always underline unprotected fields in 3270
- TTIOS-379 – Add rollover licensing feature to hit the licensing server in the background
- TTIOS-380 – 64-Bit conversion
- TTIOS-382 – Support for hostname processing before connection
- TTIOS-383 – IBMBlankChar support
- TTIOS-386 – Add ability to specify a configuration as default with a configDefault=1 tpx entry
- TTIOS-388 – iPhone 6 compatibility
- TTIOS-392 – Support for OpenSSH 6.7+

Fixes

- TTIOS-335 – DEL always behaves as BS

- TTIOS-362 – xterm-style title sequences are not always able to be terminated
- TTIOS-390 – Keepalive options showing up in Lite upgraded to Enterprise
- TTIOS-391 – Fix bug entering passwords in the macro editor
- TTIOS-393 – Disconnect buttons don't change to Connect if config changed while connected
- TTIOS-394 – Imported tpx files can't always be deleted
- TTIOS-395 – On-screen keyboard displays after scan when hardware keyboard connected
- TTIOS-396 – Connect button terminates macro recording
- TTIOS-397 – Attempting 2nd TT Lite connection renames active session
- TTIOS-398 – Configuration list items can have a missing/wrong subtitle when sessions are added/removed.
- TTIOS-399 – Industrial Browser title bar does not update URL
- TTIOS-400 – Fix bug with disconnecting pending sessions, causing all subsequent connections to remain pending.
- TTIOS-401 – Crash on telnet connection refused

ViewML Industrial Browser – May 18, 2015

- Initial release Price \$49.95

TinyTERM Lite/Plus/Enterprise v2.1.5 – May 5, 2015

Enhancements

- TTIOS-235 – Default configuration can't be changed from selected type
- TTIOS-273 – Implement clear screen scrollbar
- TTIOS-353 – Update Grabba SDK to 0.8.86
- TTIOS-361 – Scanning with a sled does not prevent device sleep
- TTIOS-365 – Change Lite icon to silver from gold

Fixes

- TTIOS-257 – 3270 macros don't always play back correctly
- TTIOS-289 – Dash key – causes 0009 error in numeric fields
- TTIOS-304 – Bluetooth arrow keys fail with Shift or Caps Lock on
- TTIOS-306 – Fix random crash in CenIndicator
- TTIOS-343 – Macros hang at CLEAR key
- TTIOS-350 – No scroll after using vi
- TTIOS-359 – Must close and restart TT to get keyboard mappings read
- TTIOS-360 – Provisioning while in Captuvo causes crash
- TTIOS-368 – Crash on macro playback

- TTIOS-371 – Modified function keys not supported on iOS
- TTIOS-372 – Wyse60 caps lock sequence leaves TT in caps lock mode
- TTIOS-374 – Cursor disappears in Wyse60 when host sets it to line
- TTIOS-381 – VT220 SRM sequence ignored
- TTIOS-384 – Configurations not updating name/host in display on iPhone
- TTIOS-385 – Crash when switching between two configurations
- TTIOS-387 – Crash with scanner connected and repeatedly starting and stopping TinyTERM

TinyTERM Lite/Plus/Enterprise v2.1.4 – December 23, 2014

Enhancements

- TTIOS-355 – Add licensing screen accessible from the global options
- TTIOS-356 – Move functionality to add/remove licenses to the licensing view controller
- TTIOS-357 – Implement client-side evaluation functionality

Fixes

- TTIOS-268 – SSH popups disable external keyboard

TinyTERM Lite/Plus/Enterprise v2.1.3 – December 11, 2014

Fixes

- TTIOS-344 – Application hangs on key remap
- TTIOS-351 – Disconnect/Cancel popup on iPad is too large in iOS 8

TinyTERM Lite/Plus/Enterprise v2.1.2 – October 27, 2014

Enhancements

- TTIOS-347 – Added a Deprovision button to remove a device from LCS
- TTIOS-348 – Add in Redpark serial cable support (direct sale TinyTERM Enterprise only)

Fixes

- TTIOS-337 – Switching from another app does not cause a crash
- TTIOS-340 – Keyboard is correct size after a crash
- TTIOS-342 – Running the 'sl' command in emulator dimensions [40,100] no longer causes a crash

TinyTERM Lite/Plus/Enterprise v2.1.1 – September 10, 2014

Enhancements

- TTIOS-331 – iOS 8 Compatibility
- TTIOS-332 – Created TinyTERM Plus product

Fixes

- TTIOS-326 – In certain emulations, UTF-8 characters don't always display properly
- TTIOS-327 – 5250 SaveScreen/Restore screen operations are not properly telnet-escaped

TinyTERM Lite/Enterprise v2.1.0 – June 16, 2014

Enhancements

- Created TinyTERM Lite free product
- TTIOS-299 – Option to display column separator as dots
- TTIOS-305 – Updated keys.ttkeyboard files
- TTIOS-308 – Combine products into a universal iPad/iPod application
- TTIOS-319 – Add product about box

Fixes

- TTIOS-272 – Importing encrypted tconfig crashes
- TTIOS-285 – Last character in 5250 fields not displaying
- TTIOS-300 – Delete key crashes in last character of some fields
- TTIOS-301 – No beeps when typing in IBM 5250 error state
- TTIOS-303 – Rotating device causes display problems in config screen
- TTIOS-320 – Fix help URL(s) for Enterprise products

TinyTERM Enterprise v2.0.3 – May 12, 2014

Enhancements

- TTIOS-66 – Mag stripe reader support
- TTIOS-81 – Scroll to top when tapping status bar
- TTIOS-125 – Integrate Mobilogics scanner SDK
- TTIOS-236 – Add option to align panning displays to either top or bottom
- TTIOS-237 – Add "Use Main Layout" option to External Layouts
- TTIOS-260 – Auto accept fingerprint

Fixes

- TTIOS-83 – No cursor when starting Industrial Browser
- TTIOS-240 – Remove Lines/Columns from web browser keyboard config view
- TTIOS-256 – Blank fields fill with asterisks
- TTIOS-259 – Application hangs/draws incorrectly after a long period of use
- TTIOS-264 – IPC 5 sled can turn on even when app is inactive
- TTIOS-267 – Fix issue with the zoom settings being reset when rotating the device from landscape to portrait.
- TTIOS-280 – Configuration lock timeout setting not operating correctly
- TTIOS-295 – Camera barcode scanner takes longer to load after multiple scans
- TTIOS-296 – Must turn on password lock timer for config lock to work

TinyTERM Enterprise v2.0.2 – February 20, 2014

Enhancements

- TTIOS-249 – Change name of keep alive options for Enterprise
- TTIOS-251 – Add network keepalive options to enterprise products

Fixes

- TTIOS-233 – Japanese and Chinese display as boxes
- TTIOS-238 – Crash on auto connect/reconnect
- TTIOS-245 – Crash in UNIX emulators due to out of bounds text drawing
- TTIOS-246 – Restore ability to edit macros on iPhone
- TTIOS-247 – UNIX-recorded macros are getting saved as 3270 macros

TinyTERM Pro 1.2.1 – November 27, 2013

- TTIOS-245 – Crash in UNIX emulators due to out of bounds text drawing

TinyTERM ITX 2 2.1.1 – November 27, 2013

- TTIOS-245 – Crash in UNIX emulators due to out of bounds text drawing

TinyTERM Enterprise v2.0.1 – October 16, 2013

- TTIOS-160 – *iOS 7 compatibility. Includes the following jira sub-items
 - 176 Title bar overlapping status bar
 - 177 Fix special keyboard handling
 - 178 Content window is 20 pixels to short
 - 179 Fix up tree to build under xcode 5 and iOS 7 sdk
 - 180 Update draw code for title bar button
 - 181 fix iPhone configure color selector
 - 182 Fix debug settings exception
 - 183 Fix light vertical bars in table view cells
 - 188 Connect button fails in iOS 7 after changing printer settings
 - 191 Bluetooth scanners drop characters on iOS 7
 - 195 Test existing scanner hardware under new iOS 7
 - 196 With hide title bar turned on, our show titlebar arrow overlaps the status bar
 - 197 Adjust slide-in animation in iPad config screens to match iOS 7 versions
 - 198 Update launch screens to iOS 7 compatible versions
 - 203 Print alignment incorrect
- TTIOS-172 – Username and password popups don't accept input in iOS 7
- TTIOS-174 – New IB connection uses last address
- TTIOS-212 – Clicking on “Legal” button in the global options causes app to crash
- TTIOS-210 – SSH connection to non-supporting host hangs
- TTIOS-209 – X doesn't clear browser url
- TTIOS-207 – Crash on start on iOS 5.1.1
- TTIOS-204 – Incomplete shading in landscape mode
- TTIOS-202 – Crash on email send if no account set up

- TTIOS-200 – Application crashes when running on iPhone 4 device with iOS7 installed when rotating the device to be horizontal
- TTIOS-201 – Norwegian 3270 keyboard
- TTIOS-156 – Un-URI-Encode the values stored in the query string of invoke requests
- TTIOS-135 – Create a javascript callback API for installation in industrial browser
- TTIOS-72 – Rotation lock for iPad
- TTIOS-62 – Ability to switch between keyboards from HTML5 apps

TinyTERM ITX 2 2.1.0 – November 15, 2013

- TTIOS-10 – VT100 double-height chars drawn incorrectly on retina (CR 1098)
- TTIOS-57 – WRU Answer Back to accept control characters
- TTIOS-64 – Macro recording crash
- TTIOS-65 – Crash during SSH verify known host operation
- TTIOS-69 – Add request for email/contact info for reporting crashes via web
- TTIOS-70 – Crash during copy/paste operation
- TTIOS-72 – Rotation lock for iPad
- TTIOS-73 – Option to close on disconnect
- TTIOS-74 – Closing, then reopening ITX 2 after SSH connect generates a crash report
- TTIOS-77 – Can't save password to Tomax config
- TTIOS-85 – Rare crash when prompted for information during an SSH connection attempt
- TTIOS-94 – VT420 displays text in wrong location
- TTIOS-99 – Add hidden config setting to allow setting title bar text
- TTIOS-100 – Enabling "Speak Selection" causes copy/paste to crash
- TTIOS-103 – Handle "tab title" sequences

TinyTERM Pro 1.2.0 – November 15, 2013

- Graphical print screen to file/email
- TTIOS-10 – VT100 double-height chars drawn incorrectly on retina (CR 1098)
- TTIOS-57 – WRU Answer Back to accept control characters
- TTIOS-64 – Macro recording crash
- TTIOS-65 – Crash during SSH verify known host operation
- TTIOS-69 – Add request for email/contact info for reporting crashes via web
- TTIOS-70 – Crash during copy/paste operation
- TTIOS-72 – Rotation lock for iPad
- TTIOS-73 – Option to close on disconnect
- TTIOS-77 – Can't save password to Tomax config
- TTIOS-85 – Rare crash when prompted for information during an SSH connection attempt
- TTIOS-86 – Crash when entering username or password via macro

- TTIOS-90 – Crash when iPod/iPad w/scanner left idle with auto connect/reconnect turned on
- TTIOS-94 – VT420 displays text in wrong location
- TTIOS-99 – Add hidden config setting to allow setting title bar text
- TTIOS-100 – Enabling "Speak Selection" causes copy/paste to crash
- TTIOS-103 – Handle "tab title" sequences

ITX 3270 for iPad 2.1.0/ ITX 3270 for iPhone 1.1.0 – November 15, 2013

- Display update speed issues
- Print screen support for 3270
- CR 1037 – Add SSL host certificate authentication UI, import and mult certs
- CR 1062 – Line draw fails on session switch
- CR 1076 – Fix font droppings
- CR 1078 – Connect button fails when config modified
- TTIOS-72 – Rotation lock for iPad
- TTIOS-73 – Option to close on disconnect
- TTIOS-75 – Prompt for hostname
- TTIOS-86 – Crash when entering username or password via macro
- TTIOS-88 – Change extensions for importing certificate files
- TTIOS-90 – Crash when iPod/iPad w/scanner left idle with auto connect/reconnect turned on
- TTIOS-99 – Add hidden config setting to allow setting title bar text
- TTIOS-100 – Enabling "Speak Selection" causes copy/paste to crash
- TTIOS-201 – Norwegian 3270 keyboard

ITX 5250 for iPad v1.1.0 / ITX 5250 for iPhone v1.1.0 – November 15, 2013

- Chinese IME support, fix overlapping DBCS chars
- Print screen support for 5250
- CR 1037 – Add SSL host certificate authentication UI, import and mult certs
- TTIOS-64 – Macro recording crash
- TTIOS-69 – Add request for email/contact info for reporting crashes via web
- TTIOS-72 – Rotation lock for iPad
- TTIOS-73 – Option to close on disconnect
- TTIOS-86 – Crash when entering username or password via macro
- TTIOS-90 – Crash when iPod/iPad w/scanner left idle with auto connect/reconnect turned on
- TTIOS-92 – Mapped ERRORRESET keys don't actually perform an error reset function
- TTIOS-96 – Check and correct if necessary the pg-up/pg-dn keys in 5250
- TTIOS-99 – Add hidden config setting to allow setting title bar text
- TTIOS-100 – Enabling "Speak Selection" causes copy/paste to crash

Enterprise for iPad v2.0.0/Enterprise for iPhone v2.0.0 – October 2, 2013

- TTIOS-23 – Print screen support for 5250

- TTIOS-47 – Combine 5250,3270,UNIX, web browsing into new Giant Enterprise Product
- TTIOS-48 – Print screen support for 3270
- TTIOS-57 – WRU Answer Back to accept control characters
- TTIOS-99 – Add hidden config setting to allow setting title bar text
- TTIOS-108 – Add "View Debug Log" to view the debug log from the actual device
- TTIOS-109 – Allow RGB Colors to be specified in .tpx files
- TTIOS-123 – Disable iPad screen timeout while app loaded
- TTIOS-124 – Add "Scan sends CR" button to Industrial Browser
- TTIOS-145 – Add print screen key to 3270 keyboards
- TTIOS-146 – Add print screen key to 5250 keyboards
- TTIOS-148 – Add external keyboard override option
- TTIOS-155 – Rotation lock should default to on
- TTIOS-157 – Default "Last Zoom Mode" with no keyboard to be fully zoomed out on iPhone
- TTIOS-158 – Add "Title Bar Hide" and "Rotation Lock" global settings to all config detail screens
- TTIOS-184 – Add TinyTERM version number in device detail
- TTIOS-10 – VT100 double-height chars drawn incorrectly (CR 1098)
- TTIOS-26 – Fix font droppings (CR 1076)
- TTIOS-65 – Crash during SSH verify known host operation
- TTIOS-70 – Crash during copy/paste operation
- TTIOS-84 – Enter key produces spaces in browser data entry fields
- TTIOS-87 – IBM 3151 Emulation crash
- TTIOS-94 – VT420 displays text in wrong location
- TTIOS-101 – Cursor position sequence ^[[6n does not work
- TTIOS-103 – Handle "tab title" sequences
- TTIOS-107 – Crash when connecting with ADDS Viewpoint
- TTIOS-114 – Linea Tab 4 for iPad 4 not recognized by TT Pro
- TTIOS-119 – Large characters (A with diaeresis, Ä) overlap descenders on line above and mostly don't display properly
- TTIOS-121 – 3270 color display incorrect
- TTIOS-126 – Browser not always saving URL containing =
- TTIOS-131 – Dollar signs (\$) displaying as British Pounds (£)
- TTIOS-132 – IBM-5555-C01 terminal not recognized in some AS/400 environments
- TTIOS-136 – Some dynamic search fields still don't work with custom keyboard input
- TTIOS-161 – VT2xx ESC[2K sequence inappropriately clearing line attributes
- TTIOS-165 – Changing rows/columns while underlining or other attribute is set will clear screen with current attribute, not the default one
- TTIOS-169 – Crash on Auto Login if no macro chosen
- TTIOS-189 – Crash on switching from Zoom to Scroll mode

- TTIOS-194 – 3270 password fields don't type as blanks
